

Ricevitore a coesore Coherer receiver

[replica]

Ricevitore a coesore racchiuso in cassetta realizzato nei laboratori elettrici di San Bartolomeo a La Spezia secondo gli schemi lasciati da Marconi, e usato sulle navi “Lepanto” e “Sardegna”, 1898-inizio Novecento.

Coherer receiver closed in a metal case built in the electricity laboratories of San Bartolomeo near La Spezia as per Marconi's diagrams, and used on the ships “Lepanto” and “Sardegna”, 1898-early 20th century.
